P.6-cf

The Chief Engineer (Invs), HECP (24)
Mysore, who was consulted in the absence of the proper drawings and other features of the Scheme of the Andhra Govt, it would be difficult for him to furnish remarks. He desired that a Lay-out Plan of the scheme of A.P. Govt, showing the area where they desire to conduct their surveys, may be obtained. Accordingly the Govt of Andhra which was requested has furnished a layout plan of their scheme (flagged "S") wherein the area indicated in white is to be surveyed in the Mysore State.

Before referring the papers (Layout Plan (25)
to the C.E.(Invs) HCP, Bangalore for remarks, it appears that the entire scheme of the A.P. Govt, ~~appears to be~~ is necessary to examine what Commitments the State Govt of Mysore have to be undertaken particularly in respect of quantum of water to be allowed after ~~the~~ utilisation if any and also other technical points in this Connection. For orders if the Govt of Andhra Pradesh may be requested to furnish their scheme for supervision of this Govt,

permission of the State Govt. for undertaking Surveys in Mysore State for the purposed H.E. projects on Upper Krishna

Ref. para 71. ante

28/3

77. Kindly see the letter of the Chief Engineer (Invstgn. of Hydro Elecl.projects) on page 43 C.F. Kindly see the File No.PWD.20 PIP 65 placed below in this connection. It is seen from that file that Govt. of Andhra Pradesh had with their letter dated 14th September 1965 addressed this Govt. for permission to undertake the surveys for a Hydro Electric project across Krishna involving investigation of water spread in Mysore State. A copy of this letter is placed at page 48 C.F. for reference. It is seen that the Govt. of Andhra Pradesh also furnished a lay out plan of this scheme with their letter dated 30-3-66 which has been in turn sent to C.E.(Invstgn. of Hydro Elecl. projects) who has asked for details of the projects to enable him to furnish his remarks. Particulars regarding this project have been called for from the Govt. of Andhra Pradesh on 6.8.66. A copy of this letter is placed for reference at page 49 C.F.

78. The above is for kind perusal and information.

83) It is obvious from the records that no permission was given by us to undertake any survey in our area. Such being the case I want to know how and with whose permission survey was done by A.P. officers. Does it not amount to unauthorised entry in our area & should we not protest to A.P. Govt for the hasty action taken by them?

Submitted:

(18) At the time when the letter of the Andhra Pradesh Government was received on the subject, the main file was before the Minister for Public Works. Hence interim orders of the Branch Officer were obtained to put up the receipt after the return of the file.

(19) The main file was received back with the orders of the Minister, Public Works thereon to issue the draft letter as from the Secretary, Public Works & Electricity Department. Accordingly the draft was revised and issued under the signature of the Secretary on the same day (i.e., 29.10.66), considering the importance of the case.

20) The letter received from the Andhra Pradesh Government was also taken notice of at the time of issue. It was felt that the letter under issuement for calling details of the project and that the letter of Andhra Pradesh was in the nature of interim reply. Hence, on this understanding, the letter was issued.

16/11

21) The above is the explanation of the Section officer, who had dealt the case. This explanation is with reference to the directions given to me on 16.XI.66 when it was instructed that it may be investigated as to why the letter of P.P. Govt. dated 14.10.66 was not put up when the letter addressed to Govt. of A.P. in this Department was put up on 26.X.66. The Secy Pw. felt that had the above nature of this letter

22

RwD 11 BRA66.

from DP. Govt. The letter roomed on 29.10.66 by us could have been modified. In this regard I have to submit that though it was incorrect on the part of the Sectional Officer for not having put up this letter on 25.x.66, I regret it was also a lapse on my part for not remembering this letter of DP. Govt. I have instructed the Sectional Officer to be careful in future in this regard and I also regret the lapse on my part and request that the same might kindly be excused.

Receipt No. 121/ID/Spl/67 from Power ~~Projects~~.

124) letter No. 3314-DI/65-18 dated 30.3.1967 from the Govt: of Andhra Pradesh placed at pages 78 to 81 of C.F. may please be perused. Previous references as referred to in P.W.D may please be seen at flags 'N.N.O.P.' They have enclosed a blue print showing the approximate area of Submergence of 11 thousand acres of Cultivable ~~area of Submergence~~ lands in Mysore State and other details of upper Krishna Hydro Electric Scheme as called for in this Govt: letter at flag 'N'. Referring to letter at flag 'P' it has been stated that some of their staff have visited some areas in Raichur Dist. for reconnaissance purposes and to gather data regarding discharges in the Krishna River as per gaugings conducted by the C.W.P.C, and that those visits were purely preliminary and do not carry any significance. They further want to gather details regarding the Temples, Houses, etc expected to be Submerged on the plea that the same are not available with them. And hence it has been requested to Govt: of Mysore to accord permission to conduct Surveys, by their Chief Engineer Electricity (Civil) ~~of this State~~ within the territory of Mysore.

Sir 18/4/67

125) The letter of the Andhra Pradesh Govt placed at page 78 of C.F. may kindly be perused. The Govt of A.P have requested permission of this State to the Surveys being Conducted by the Chief Engineer (Civil) of their State within the territory of Mysore.

It is noted that Surveys within their territory have almost been Completed.

It is a point for orders whether the remarks of the C.E. Investigation & Project (HCP)

may be obtained in the first-instance.

Receipt No. 2635 from C.E. P.W.D.

141) Letter No. CEI/KGE/2/TA4 dated 7-7-67 from the Chief Engineer Investigation of Projects placed at pages 99 to 100 may please be perused. He has narrated 4 reasons which are noted below, and suggested that even permission to Govt. of Andhra Pradesh for Investigation should not be acceded to:—

1. Inspite of repeated references, the final allocation of Krishna waters between the three States has not been made so far.
2. Even against the interim allocation of 203 T.M.C. to Andhra, the list of Projects so far sanctioned, executed and proposed in A.P. has not been made available to this State;
3. The area, which will come under submersion, if the Project materialises, though small and may be compensated for, can be brought under irrigation from either the Tungabhadra Project or the Upper Krishna Project. It is a matter for consideration as to whether an area which is to get the advantage of irrigation at a heavy cost should be allowed to be submerged for a power project which can be generated by other means but not at the cost of irrigation.
4. Andhra Pradesh has other Hydro-Electric Projects like Srisailam, Nagarjunasagar etc., downstream, inspite of Protests by Mysore Govt. At Present there is no machinery to check or prevent either alteration in the

Contd...

M. G. S.

File No. PWD 11 BRA 66

scope of Sanctioned project or ~~etc~~ ulterior use to irrigation also during execution.

142) For orders whether a reply on the lines of information furnished by the Chief Engineer (Investigation) projects may be sent to the Govt of Andhra Pradesh

DS 12/7/67

14/7/67

143) Kindly see the report of the Chief Engineer at Page 99/c.f. Even though the proposed Hydro-Electric Project across the Krishna near Gadwal does not provide for any irrigation component under ~~the Scheme~~ it, the Project causes submersion of about 11,000 to 12,000 acres of land in Raichur District in Mysore State involving about 13 villages. These villages possibly could be provided with irrigation facilities from the Upper-Krishna Project ~~Left~~ Right Bank Canal. Therefore, the submerging of these villages for the sake of the power generation which could certainly be obtained usefully from other sources cannot be accepted We may therefore as suggested by the Chief Engineer inform the Govt. of Andhra Pradesh that ~~we~~ we are not agreeable to permit any investigations being carried out in our State for the said Project.

RECEIPT & ISSUE SECTION

Sir,

Sub: Upper Krishna Hydro-Electric Scheme Investigations, Water spread survey in Mysore State - regarding -

—

With reference to your letter No.PWD 20 PIP 65 dated 21st October 1965, enclosing a copy of D.O. letter No.3314-D1/65-1 dated 14th September 1965 of Secretary, P.W.D., Andhra Pradesh on the above subject, I write to state that it would be difficult for me to furnish any information on this subject without proper drawings and other features of their scheme. Therefore, I request you kindly to address the Secretary, Public Works Department, Andhra Pradesh, to send a lay-out plan of their scheme, showing the area where they desire to conduct their surveys.

Yours faithfully,

(M.V.A.Setty) 26/10
Chief Engineer,
(Investigation) Hydro-electric Projects,
Bangalore.

—

Sub:-Upper-Krishna Hydro Electric Scheme-Investigation, Water spread survey in Mysore State -Regarding

We are investigating the possibility of power generation on Upper Krishna and surveys are being carried out by this State. Survey of certain areas in Mysore is also necessary in this connection. I request that the Government of Mysore may kindly accord permission to these surveys being undertaken by the Chief Engineer (Civil) of this State.

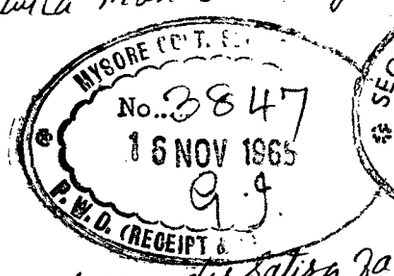
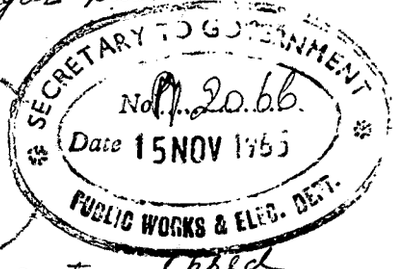
The Honourable chief minister Govt. of Mysore, Bangalore

Sub:- construction of Hydro electric project on Krishna River at Jawalala in gadwal Taluka mahaboobnagar Dist (Andhar pradesh)





Respected Sir,

G.G Lobo 15/11

There is a rumour and very dissatisfaction spred among the public by the statement made by the minister for public works govt. of Andhar pradesh that govt of Andhar pradesh have proposed to construct Hydro electric project on Krishna River near Jwarala in gadawal Taluka mahaboobnagar (Dist). It is said that survay work also has been done upto Krishna Bridge in mysore state By the construction of the said pro very important places and religious temples and mathas will be submerged for example Sri Nairagaddi Matha Sri Ramagaddi Matt Temple Sri Dattatreya will come under submerge area. Besides this nearby ten villages of Raichur Tq. will be submerged. We will loose at least ten thousand area of land that is irrecoverable loss to the mysore State. Specially for Raichur (Dist). There is a lift by submerge Deodurg Sooguer water works from there the water is supplying to Raichur city. If it is fact our government under your leadership and Suitable action Kindly be taken necessary correspondance be made with that to Andhar pradesh the proposed (project may be dropped.

Hence I earnestly request yourself, press the statement kindly be made in this behalf to with satisfaction of the public in the interest of the mysore state. Please treat this most urgent.

Thanking you

2 with kind Regards

Yours sincerely

MEMORANDUM.

Before the honourable Sri Veerendra Patil,
Minister for P.W.D., Govt.of Mysore, camp: Raichur
Dated: 10th June, '66.

Respected Sir,

We the President, Municipal Councillors & the Citizens of Raichur City would like to bring the following few facts before your ~~Raichur~~ honour with a hope that our grievances would be met sympathetically.

Your kind attention is invited to the news appearing in " The Indian Express", Bangalore edition dated 4th June, '66 on page 3 under caption "~~A.P.~~ Granted Project may hit fifteen Mysore villages" this news has really shocked the people of Raichur.

It is regretted to bring to your kind notice that about 15 villages including Naragadda, Kurmagadda, which posses fertile lands of our Raichur Taluka are being sub-merged. In respect of Kurmagadda we may bring to your kind notice that it is one of the famous Piligrim bring the seat of Sri Jagadguru Urkundeswamy and Sri Dattatreya Narasimha Saraswati where thousands of Devotees visit this place from all over India. Further our Head water works of Devasugur which has been constructed at an estimated cost of 15 lacks during the Silver Jubilee of the H.E.H. Nizam and the life of Raich City will be submerged.

Still the Krishna water dispute between Andhra Pradesh and Mysore is under consideration, so any action at this stage is quite hasty and unjust to the Mysore State.

Survey work also has been undertaken and completed without consulting the responsible officials of the Mysore State.

Hence, we humbly request your honour kindly to use your good offices and to see that the above scheme which goes against the interest of 50 thousand population is stopped forthwith.

Yours faithfully,

President City Municipal Council

News Item taken from 'Indian Express' dated 4th June 89 1966.

16

A.P. PROJECT MAY HIT 15 MYSORE VILLAGES

(Express News Service)

RAICHUR, June 3.

ABOUT 10,000 acres of fertile land in about 15 villages of Raichur taluk bordering Andhra will be submerged if the Andhra Government goes ahead with its plan to put up the Rs.40-crore hydel project on the banks of river Krishna.

The project is likely to be located at Gundal village of Gadwal taluk, 40 miles way. Before the State reorganisation Gadwal and Alampur taluks here partly of Raichur district.

Andhra officials, who had been working on this project for months were frequently visiting the Mysore side villages and have almost completed the survey and field works in about 20 villages in Raichur Taluk.

The danger to Mysore villages will be owing to the reservoir waters of the proposed project.

Andhra officials had also taken relevant revenue records and other materials pertaining to those villages from the concerned departments here.

The panic-stricken villagers have appealed to authorities seeking protection.

The villages in danger are Murtiplinaragaddi, Athur, [illegible] Hongarampur, Kurvakurd, Kurvakala, Tagraharu, Mangigaddi, [illegible] Kumm Kurmagadda, Kamagaddi, Kortakundi, Korvihal, Ganjahalli, Doosugur and Buddipadpara.

Of those, Maragaddi, Kamagaddi and Karmagadda are famous pilgrim centres, to which hundreds of devotees flock from the country every year.

About 25 villages in Gadwal taluk will also be submerged in the reservoir and there is a plan to supply drinking water to Gadwal town from the project.

The Raichur water headworks at Doosugur village, on the banks of Krishna river, 15 miles way, from where Raichur is now getting its drinking water supply, will also be affected by the project.

Copy of Memorandum dated 10th June, 1966 from the President, Municipal Councillors & the citizens of Raichur City, to the Hon'ble Minister for P.W.D., Bangalore.

—

We the President, Municipal Councillors & the Citizens of Raichur City would like to bring the following few facts before your honour with a hope that our grievances would be met sympathotically.

Your kind attention is invited to the news appearing in "The Indian Express" Bangalore edition dated 4th June, 1966 on page 3 under caption Gundal Project may hit fifteen Mysore villages" this news has really shocked the people of Raichur.

It is regretted to bring to your kind notice that about 15 villages including Maragadda, Kurmagadda, which posses fertile lands of our Raichur Taluka are being sub-merged. In respect of Kurmagadda we may bring to your kind notice that it is one of the famous Piligrim ~~bring to your kind notice that it is one of the famous Piligrim~~ bring the seat of Sri.Jagadguru Urhundeswamy and Sri.Dattatreya Narasimha Saraswati where thousands of Devotees visit this place from all over India. Further our Head water works of Devasugur which has been constructed at an estimated cost of 15 lakhs during the Silver Jubilee of the H.E.H. Nizam and the life of Raichur City will be submerged.

Still the Krishna water dispute between Andhra Pradesh and Mysore is under consideration, so any action at this stage is quite hasty and unjust to the Mysore State.

Survey work also has been undertaken and completed without consulting the responsible officials of the Mysore State.

Hence, we humbly request your honour kindly to use your good offices and to see that the above scheme which goes against the interest of 50 thousand population is stopped forthwith.

MYSORE GOVT. SECRETARIAT No 924 26 JUL 1966 P.W.D. (RECEIPT & ISSUE SECTION)

MYSORE GOVT. SECRETARIAT No ..... 26 JUL 1966 P.W.D. (SPECIAL IRRIGATION)

The Superintending Engineer, Irrigation Investigation Circle, Yermarus has reported after enquiry at appropriate quarters that the above Project is said to be in the investigation stage and that the preparation of the Project Report is in full swing.

A brief note on the proposed Gadwal Hydel Project received from the Superintending Engineer, Irrigation Investigation Circle, Yermarus, is forwarded herewith for perusal.

A topo-sheet extract showing the proposed project site and the area in Mysore State that may get submerged as a result of the Project are marked and enclosed herewith for perusal.

The proposed Gadwal Hydel Project does not find a place in the Krishna Godavari Commission Report and is altogether a newly conceived Project.

The interests of Mysore directly affected are:-

(1) Submersion of lands and village sites of 10 villages and lands only in 6 villages. Total submersion 12,000 acres.

...2)

(2) Submersion of Raichur Water supply works situated at Deosgur.

(3) Bangalore Hyderabad road the Krishna road Bridge.

It is not improbable that eventually Andhra Pradesh might draw water from this huge reservoir for irrigation also in addition to generation of Hydel power, thus affecting the sharing of Krishna waters. Government may therefore, take action to record its objection to the proposed scheme with the Government of Andhra Pradesh and also bring the matter to the notice of Government of India.

It is alleged in the news item that surveys were carried out in Mysore territory and even revenue records were taken from the Departments and village Officers by the Andhra Officials. A report in this matter may be called for from the concerned Deputy Commissioner.

Yours faithfully,

CHIEF ENGINEER, PWD,
INVESTIGATION OF PROJECTS, B'LORE.

L.V/22.7.

BRIEF NOTE ON GADWAL HYDEL PROJECT IN ANDHRA PRADESH

It is learnt that one Hydro Electric Project is under contemplation in Andhra Pradesh amounting to Rs. 40 Crores across Krishna river at Jurala village in Gadwal taluk of Mahboob Nagar District. The proposed site for the dam is about 5 miles upstream of Railway Bridge on Secondrabad Dornachallam line. The proposals are to construct a dam near Jurala village across Krishna and utilise the water so stored for generation of Electricity only to the extent of about 2.50 lakh K.W. (units) . With the construction of this Project 10 villages (as per list attached) of Mysore State will be submerged and lands of 6 more villages also will come under submersion. The total area so affected will come to 12,000 acres.

As regards Deosugur water works, it is felt that the area around the low lift pumps and sump well will all be under water to a depth of about 1' to 1½' and the approach road will be required to be raised at least to R.L. + 1103.00 which is now less than + 1100.00 near the pumping station.

The Road Bridge on Hyderabad Bangalore Road will also be affected. The bed level of the river near the bridge is about 1067.00. Therefore, about 33' of water will be standing at F.R.L. of the proposed reservoir and thus affect the discharge through the Bridge. The railway bridge on Madras Bombay line which is about two miles upstream of the road bridge will also be affected to some extent. The bed level of the river at this Bridge site is near about + 1072 . Therefore, here also there will be standing water in between the piers to a depth of 28 feet.

Salient features of the Project are reported to be as follows:-

(1) Location:-

(a) Latitude N = 16° - 17'
(b) Longitude E= 17° - 48'

...2)

Situated across Krishna river in Atmakur Taluk of Mahaboobnagar District. The site is 4 miles north of Gadwal town and 3 miles South of Atmakur town of Mahaboobnagar District.

(2) (a) C.A. of river above dam site:

Free	5168	Square miles.
Intercepted	45322	-do-
Combined	50400	-do-

(b) Mean annual rainfall in the basin = 25" to 40"

(3) Dam and Reservoir:-

a)	Deepest ~~and~~ bed level	+ 908.00
b)	F.R.L. of the reservoir	+ 1100.00
c)	Minimum draw off level	+ 1040.00
d)	Water spread @ F.R.L.	+ 1,14,611 acres.
e)	Capacity at F.R.L.	164650 M.Cft.
f)	Provision for sill @ + 1040.00	16900 M.Cft.
g)	Crest of the spillway.	+ 1050.00

(4) Masonry Dam:-

Length of spillway portion	891' feet
Length of Non-over flow portion	1089 feet
Total length	1980 feet
Crest level of spillway	1050 feet
Number and size of spillway gates-	12 Nos. 60' x 50 ft.
-do- of river sluice	18 Nos. 8' dia.

(5) Earthen Dam:-

Left (bank) Flank	20,912 feet
Right (bank) Flank	19,290 feet.
Total:	40,202 feet.

Height of the earthen dam vary from 0 feet to 125 ft., above the average bed level of river.

Cost of the Scheme -	Rs.	4,000 lakhs.
Area of Mysore State coming under submersion		12,000 acres.

MEMORANDUM.

Chm 3091/66 24/8/66.

CM desires that Secy. to Govt. PWD may see this petn.

14.8.66 SS PWD 24/8

The Hon'ble Chief Minister,
Mysore State, Bangalore
Camp Raichur.

Respected Sir,

We, the agent and disciples of Sri.Naradagadda Channabasava Swamy Math and the Archaka (Pujari) of Sri.Dattatraya Temple at Kuruvakala village and Ramagadda Math Ta.Raichur, submitted the following memorandum for your Honour's kind perusal and sympathetic action:

Sri.Naradaggdda Channabasava Swamy Math is situated in a small island in the middle of the Krishna river at the last corner of the North Eastern side of our State and it is at a distance of 20 miles from Raichur. There is the Samadhi of the Saint Sri.Channabasava Swamy. This place is a holy place for all the pilgrims coming from far and near. The devotees and people who go there to worship belong to all casts and creeds and speaking both Kannada and Telugu. There is a fair arranged every year on the Phalaguna Suddha Panchami. The car festival is very big. About 30,000 people will gather in the Kshetra. The Samadni of this holy Saint is about 300 years old. The references to the life of the Saint and to this Kshetra are mostly found in the Puranas and historical epics like Gururaj Charitra of the poet Siddha Nanjesha. There is also evidence to this in the government records.

Just on the Western side of this Kshetra at 2 miles there lies another important Sri.Gurudevdatta Temple on a small island in the middl of the Krishna river. This Temple, sir, is older than even the Ganagapu Kshetra near Gulbarga. It is 700 years old. It is a holiest original place of Sri.Gurudatta Deva. People from different parts of India come to this place for worship.

Again there is another Kshetra about 2 miles from this Kshetra known as Choleshwar Swamy Math of the Ramagadda on a small island in the stream of the river Krishna. There is a Samadhi of a great Saint by name Choleshwar Swamy. This is also an old sacred Kshetra.

This range of holy islands from Ramagadda to Naradagadda are most sacred places, situated as they are in the mid stream of the Krishna. In this connection we wish to invite your urgent attention to the proposal of the Andhra Pradesh Government Scheme. Sir, we impress upon that the Andhra Government have proposed to take up a Hydro Electric Project on the river Krishna near the place called Gundala which

is about ~~20~~ 10 Tan miles from the above mentioned Kshetras. The government of Andhra Pradesh have completed the survey of this Project area. According to their estimates about 11 villages of our States with 15,000 acreage of fertile land will be submerged, consequent on the execution of the Project. And all the above 3 Kshetras also will be under water.

So the people of this area and disciples of the 3 Kshetras are now panicstricken. The water works of ~~the~~ Raichur at Devasugur and the road bridge on the Krishna river will also be affected. Besides this, our State will not get any benefit from this Project except the loss of not only the villages and 15,000 fertile lands but also of the important sacred places of our State. There-by the people of this area are mostly frustrated and disappointed. In short their feelings are hurt.

In view of the above facts, Sir, we humbly request your honour kindly to protest to the Government of Andhra Pradesh regarding the construction of this Project and see that the benefits and the interests of the people of our States are protected. There-by the people of this area shall be greatly indebted to you forever.

Raichur.

Sub: Protest against the imminent submergence of Kuravapur island consequent to the execution of the Gundala Hydro-Electricity Project by the Govt. of Andhra Pradesh.

Respected Sir,

With reference to the above subject, we the Devotees of Lord Dattatreya of Kuruvapura (Kuruvakala) Kshetra beg to submit most respectfully the following few lines for your kind consideration and necessary action.

Kuruvapura, also known as Kuruvakala or Kurugadda is an island in the river Krishna situated at a distance about 16 miles from Raichur City on the north eastern border of our State. This place has been consecrated by the penance performed here about 700 years ago by Sri. Sripad Srivallabh Swamiji, universally acclaimed as an Avatar of Lord Dattatreya. Sri. Sripad Srivallabh Swamiji originally belonged to Pithapuram in Andhra Pradesh who being very much attracted by the serene and holy atmosphere of Kuruvapura island in the river Krishna settled down here and dedicated his life for the spiritual uplift of humanity through his hard penance and divine powers. Even after the elapse of 700 years of that historic and memorable event his divine presence is unfailingly giving solace and comfort to his devotees scattered throghout the whole of India. Every year Datta Jayanti is performed here on a grand scale and thousands of devotees from all over India flock to this holy place. Even on other days piligrims from far and near visit this sacred island to offer their respect and devotion to the great avatar and seek his blessings.

No. 2063
27 AUG 1966
GOVT. SECRETARIAT
No. 2063
29 AUG 1966
P.W.D. (REGD.)

It is learnt that the Government of Andhra Pradesh is going ahead with a Hydro-Electricity Project known as Gundla Project which envisages the submergence of about 11 Villages of Mysore State including the holy islands of Kuruvapura Kshetra, Naragadda and Ramgadda. Besides this about 15000 Acres of fertile land of our State are also likely to be submerged. This has very severely affected the rligious sentiments of the devotees of Dattatreya. We are fully confident that this legitimate grievance of Datta Bhaktas will receive the attention that it merits from your Worthy Govt.

We earnestly request you to urge the Govt. of Andhra Pradesh to abandon the proposed Gundala Project or in the alternative to reformulate the scheme excluding the submergence of the holy Kshetras of Kuruvapura, Nargadda and Ramgadda.

We beg to remain, Sir,

Yours faithfully,
DATTA BHAKTAS.

Sub: Construction of Hydro-Electric Project at Jwarala in Andhra Pradesh.

Sir,

In continuation of my letter No.67 of 4th Novr.,1965, I have not received the information about the action taken by the Govt. of Mysore. It is very urgent matter and the people of Raichur Dist. are dissatisfied by the aggressive action of Andhra Pradesh.

Therefore I earnestly request you to take prompt action in this matter and the same may kindly be informed and the statement also be made in this behalf.

Thanking you,

Yours sincerely,

(A. Sharnappa, M.L.A.)

No.PWD 11 BIA 66

To

The Secretary to the Govt.of India,
Union Ministry of Irrigation &.power.
New Delhi.

Sir,

Sub:- Construction of Hydro-Electric Project in Andhra Pradesh on the hiver Krishna in Mahaboobnagar District.

It is learnt that the Govt. of Andhra Pradesh has investigated the construction of a Hydro-Electric Project in Andhra Pradesh on the hiver Krishna in Mahaboobnagar District. According to the information available, this Project will cause submersion of about 12,000 Acres including 10 Villages in Mysore State. Submersion of Raichur Water Supply works situated at Devasugur and submersion of a part of the Bangalore - Hyderabad Road is also likely to occur. Apart from the question of the utilisation of waters in Krishna River which is not yet finalised, the fact that a large area in Mysore State is likely to be submerged under this Reservoir, the Govt. of Andhra Pradesh was addressed in letter No.PWD 28 GUK 65 dated 13-12-1965, a copy is enclosed for reference, to intimate whether the information that a Project causing submersion in Mysore State is taken up by them is correct and if so to furnish details of the same. No final reply has yet been received from the Govt. of Andhra Pradesh. With their latest letter No.5016-D1/65-66 dated 8-8-1966 (copy enclosed) it has been intimated that the matter is under examination and a reply would be sent shortly.

Several representations have been received from the people of Raichur District apprehending loss of their properties, etc., by the proposed Project. I am therefore directed to request you to prevail upon the Govt. of Andhra Pradesh

Gundal project study defended

Express News Service
HYDERABAD, Sept. 2.

Mr. G. A. Narsimha Rao, Additional Secretary, Public Works Department, told ENS here today that nothing was done by the State Government to provoke anybody in the construction of the Gundal project.

Asked about the Andhra Government's reaction to the recent statement of MPCC President Mohammad Ali, he said all that happened was that some engineers visited that place at the instance of the Central Water and Power Commission.

It was reported earlier that Mr. Mohammad Ali had opposed the construction of the project on the ground that it would submerge 10,000 acres of land in Raichur in Mysore State.

KOPPAL
(Raichur District)

7th Septr. 1966.

Dear Sri. Veerendra Patil,

Re: Gundal (Hydal) Project : Constriction of by A.P. Government.

While drawing your attention to the statement of Sri. Mohammedali, President, M.P.C.C., appearing in the Indian Express of 1st Septr. 1966 on the above subject, I wish to state that the site is about 20 to 25 miles from Raichur. It is said that ten villages of Raichur Taluk would be submerged by the construction of Hydal Project across the Krishna River. I understand that so far they have not consulted our Government nor the local officials but they have actually surveyed the area and have taken out trial pits also.

The other day, when this matter was discussed in the D. C. C. in the immediate presence of Sri. Mohammedali on August 19, 1966, the members expressed their great anxiety over this matter.

I request you to please cause necessary enquiries in the matter and take suitable action immediately.

With best regards,

Yours sincerely,

(Sanganna Agadi).

Andhra warned against Gundal project

Express News Service

RAICHUR, Aug. 29

The Mysore Pradesh Congress Committee president, Mr. Mohammed Ali, here recently warned the Andhra Government against its move to construct the Gundal Hydel Project on Krishna river, 45 miles away.

Addressing Congress workers, he said "if the Andhra Government goes ahead with the project," we (Mysoreans) will blow it up."

Over 15 villages and 10,000 acres of fertile land in Raichur taluk are likely to be submerged by the project.

Mr. Mohamed Ali was touring the district in connection with the ensuing general election.

He told Congress workers to avoid personal criticisms to secure ticket.

Gundal project study defended

Express News Service
HYDERABAD, Sept. 2.

Mr. G. A. Narsimha Rao, Additional Secretary, Public Works Department, told ENS here today that nothing was done by the State Government to provoke anybody in the construction of the Gundal project.

Asked about the Andhra Government's reaction to the recent statement of MPCC President Mohammad Ali, he said all that happened was that some engineers visited that place at the instance of the Central Water and Power Commission.

It was reported earlier that Mr. Mohammad Ali had opposed the construction of the project on the ground that it would submerge 10,000 acres of land in Raichur in Mysore State.

TDB work reviewed

Express News Service

RAICHUR, Sept. 3

Mr. R. M. Patil, Panchayat Raj Minister, met the members of the Raichur taluk development board here on Thursday and reviewed the activities.

Mrs. Nagamma, MLA, told the Minister that the Andhra Government has planned to construct a hydel project at Gundal on Krishna River about 40 miles from Raichur, as a result of which about 10,000 acres fertile land and about 10 villages in Raichur taluk would be submerged.

She appealed to the Minister to take serious view of the proposed project and take immediate counter activities.

Deputy Commissioner Jayakumar Anagol and TDB chief Basangowda received the Minister. Ghouse Mohiuddin, MLA, was present.

Sub: News item appearing in Indian Express dated 4-6-1966 regarding taking up of Gundal Hydro Electric Project by Government of Andhra Pradesh.

Ref: Your office L.No.718/TBP/MSC/1966-67 dated 17.8.1966.

2. D.O.No. 718/TBP/MSC/66-67/66-67 dated 29-9-1966 from the Deputy Development Asst.to Dy.Commissioner, Raichur.

Sir,

During my visit to Chandrabanda Circle on 4th and 5th of this month I visited villages Chandrabanda, Yapaldinni, Budipad etc., the area that is going to be affected by proposed Project and conducted enquiries. I have also taken statements from the concerned village officials. In this connection it is to be submitted as under :

(a) Furnishing of records by our officials.
(b) Survey carried in Mysore State.

(a) FURNISHED THE RECORDS.

The village officers have denied that they have furnished any records to Andhra Pradesh officers.

It was stated by some of the people that since these villages of Raichur formed part of the erstwhile State of Hyderabad, the necessary survey and Settlement Records are available with Andhra Pradesh Government being the successor State for Hyderabad where the Head Offices were situated.

(b) SURVEY.

The enquiries revealed that no records were made available but some of Andhra Pradesh Officials did visit the border villages as is usual in the border areas of two States. The importance of their visit was not understood by the people in the villages. It received wide publicity when there was propaganda about it.

Yours faithfully,
Sd/-

Centre's apathy towards Upper Krishna deplored

Express News Service

RAICHUR, Oct. 10

IT is most unfortunate that the much-needed and much-published Rs. 120-crore Upper Krishna Project at Alamatti and Narayanapur in Bijapur and Gulbarga districts has again fallen into ignominy.

Apart from the indifference of the Centre to this legitimate demand of the Mysore State, the recent recommendation of the Central Water and Power Commission to take up the Rs. 40-crore hydel project on the Krishna river at Gundal has dashed the hopes of the people of Mysore. It clearly means it would not be taken up in the near future.

Apart from the jolt, the impact of taking up the Gundal project, will result in submerging 10,000 acres of valuable land in Mysore, in addition to submerging another 10 villages, ultimately to be a major hurdle in the implementation of the Upper Krishna project.

Old promises

It must be remembered by the Central Government and the Planning Commission that the foundation-stones for both Almatti and Narayanpur projects have been laid by the late Prime Minister Lal Bahadur Shastri on May 22, 1964, when he was Union Minister.

It must be also remembered by the Centre that Almatti and Narayanpur project sites were approved and sanctioned by the Planning Commission and the Central Water and Power Commission.

When all is set, there is no reason why the Union Minister for Irrigation, Mr. K. L. Rao, should accord priority for the Gundal hydel project, relegating to the background the Krishna.

The Upper Krishna project is to provide irrigation facilities, to the districts of Gulbarga and Bijapur on the left bank and Raichur district on the right bank to the extent of nearly 12-lakh acres.

The districts of Gulbarga and Raichur situated in the northern part of the new Mysore State, have been integrated into the old Mysore State. The people of these districts including Bidar mainly depend on their agricultural lands poorly fed with rains ranging from 18 inches to 20 inches per annum for their survival.

On account of frequent occurrences of famine conditions in this area, the Government had to spend a good amount of its revenue for protecting the people by taking up relief works.

The former Hyderabad State, therefore, thought of providing permanent irrigation facilities to this area as far as back as 1900 A.D. Accordingly it set up a 'capital investigation circle, to investigate the possibility of taking up some irrigation schemes across the major and minor rivers in the State of Hyderabad.

In 1930, after detailed investigation and surveys, the Government of Hyderabad, drew up the Upper Krishna project proposing a storage dam near Kamaladinni in Raichur district, with a storage capacity of 56,027 ft. with FRL. 1635.00 etc.

However, due to political, economical, and other resources, as also due to the Second World War, this project did not materialise.

After independence the Centre faced with acute food problem in the country appointed a "technical committee" to report on the optimum utilisation of Krishna waters by the then States of Hyderabad, Bombay, Madras and Mysore.

Stalemate

With the quantum of water allocated, the Hyderabad State had in view the construction of two dams across the Krishna river, one in the higher reaches to irrigate the lands of Raichur and Gulbarga districts and the other lower down at Nandikonda, now known as Nagarjunasagar, jointly with Andhra.

But owing to various reasons this scheme again did not materialise, thus taking its own course of time.

After the States' reorganisation in November 1956, the three districts of Bidar, Guibarga and Raichur of former Hyderabad State and four districts of Bijapur. Belgaum, Dharwar and Karwar of Bombay State, formed the northern part of the new Mysore State.

The new Mysore State accorded approval for the detailed investigation of the Upper Krishna and Bhima projects during 1957.

After detailed surveys and inspections of the 'standing advisory committee the Kamaldinni site proposed by the then Hyderabad Government was discarded due to technical reasons and it was suggested to move the dam site to Narayanpur, lower down the previous one.

Subsequently, with a view to providing irrigation benefits to the famine-stricken areas of Bijaput district also, the standing technical advisory committee in their 39th meeting held in April 1960, desired to have two storage reservoirs instead of one.

One at Alamatti to provide irrigation facilities to Bijapur district and another at Narayanpur for Gulbarga and Raichur districts.

Accordingly, a scheme to irrigate 12 lakhs of acres of land in the districts of Bijapur, Gulbarga and Raichur and costing Rs. 120 crores was proposed and preliminary works at both sites were taken up.

Almatti dam with a canal on the left bank to irrigate 5.5 lakhs acres in Bijapur and Gulbarga districts.

Narayanpur dam with left and right bank canals to irrigate 6.5 lakhs acres in Gulbarga and Raichur districts.

The Planning Commission and the Centre in Nov. 1963, approved the first stage of the Upper Krishna Project costing Rs. 58.20 crores and consisting of the lower dam at Narayanpur with left and right bank canals to irrigate 2.8 lakhs acres in Gulbarga district and 3.20 lakhs acres in Raichur district respectively.

Provision

A provision of Rs. 30 lakhs was also made under this scheme for the foundation works of the Almatti dam which comes under periodical submersion of Narayanpur dam.

Further investigation are being continued to suitably staging the works so that the maximum benefit can be obtained from the project at the shortest period.

Prelimenary works as approach roads colony, staff quarters and buildings inspection bungalows and office buildings and procurement of tools and plant required for the execution of this project have been already completed spending lakhs of rupees.

The excavations works for the foundations of both the Narayanpur and Almatti dams have already started and foundation stones of both the dams were laid by the late Lal Bahadur Shastri on May 22, 1964.

Raichur district will be the luckiest district in the Mysore State in regard to irrigation facilities, should this project implemented. Already the Tungabhadra Project has helped cultivate 5.8 lakhs acres in the area.

er loans

some decades.

Another "rule of thumb" applied upto now in distributing IDA funds is that the donors have wished 70 per cent of IDA resources to go to India and Pakistan.

The World Bank agrees in principle that the present situation is unsatisfactory. That is why the Bank President Mr. George Woods, has been pressing the rich countries to quadruple IDA's resources so that for the next three years IDA would be able to disburse one billion dollars a year. When more resources are raised, the Bank would be able to reduce the percentage for India and Pakistan without affecting their total and, indeed, increasing it. Instead of distributing a small cake equally and leaving everybody hungry, the World Bank wants to follow a logical policy of ordering a larger cake so as to satisfy all demands.

Negotiations

It is stated that when Mr. Woods first presented his proposal for quadrupling IDA's resources at a closed meeting of the Europeans, he was greeted with a stony silence. He was, however, persistent and thanks to his energy and determination, the Europeans have agreed "in principle" to consider increases in their contribution. The United States too wants to do more for IDA but it has its balance of payments problems and rising prices at home and it wants to ensure first, that other nations will share the burden on an equitable basis, and, secondly, the American balance of payments position will not be adversely affected by payments to an international organisation which is opposed to tied loans.

Delicate negotiations are still ahead. It is thought unlikely that Mr. Woods' hopes will be realised in full. How-

Behind the news

NEW EXPORTS

IN the face of strong international competition, an Indian firm has secured the largest individual export order for supplying a particularly sophisticated category of engineering goods—transmission line towers for the distribution of electricity. The towers are to be supplied to the Kainji development project of the Niger Dams authority in Nigeria. The total value of the goods exported would be about Rs. 1.9 crores. It is a matter of pride that India should be in a position to export transmission line towers, which constitute something more than the export of engineering goods—for they are also the export of engineering technique and know-how.

The transmission line tower industry in the country came into being in 1951. It is entirely to the credit of this industry that within a decade and a half it has not only developed sufficiently to meet the demands of the country but is also in a position to secure work in the international market, which demands highly complex and sophisticated techniques of design. The firm Kamanis—now have their tower testing station at Jaipur. It is one of the largest in the world for it is equipped with fully remote control facilities.

It is surprising that the Indian firm should have obtained the large order in the face of stiff competition from Italy and Japan in view of the fact that the types of steel available in India are limited. If the Government is serious about export promotion they must see that engineering goods get the right kind of raw materials, particularly steel. This new industry has a great future, particularly as the USA is now showing interest in buying Indian-made transmission line towers.

J. R. D. TATA

IN honouring Mr. J. R. D. Tata the Indian Government has paid belated tribute to one of the pioneers of Indian aviation. The history of air transport in India is really the story of Mr. Tata, industrialist, philanthropist and pioneer aviator. Tata Airlines was founded in 1932 and it subsequently became known as Air-India. Tata Airlines inaugurated the first scheduled air mail service in India from Karachi to Madras via Ahmedabad, Bombay and Bellary on October 15, 1932. Mr. Tata himself piloted the tiny De Havilland Puss Moth, purchased for £1,000 on its maiden flight from Karachi to Bombay via Ahmedabad carrying four precious bags of mail. An Englishman Nevill Vincent took over from Bombay for the rest of the flight to

Agricultu priority a

By O. P. K

THE equivocal language in which the Fourth Plan is couched makes it extremely difficult for one to distinguish between the platitudes and policies and to arrive at definite conclusions. In order to overcome this difficulty it is perhaps safe to ask some direct questions which vitally concern the nation and seek straight answers. Will the Fourth Plan end or prolong the sad tale of broken promises of food self-sufficiency? Will it improve the standard of living of the masses, which, after all, is the raison d'etre of planning. And finally, will it help achieve the national objective of a rapid industrial break-through?

Self-sufficiency in foodgrains has become for us a life and death question. There is a demand from almost every quarter that the agricultural sector must be given the supreme attention. In response to this universal demand, the planners assert that the Fourth Plan gives topmost priority to agriculture. But there is hardly any basis to justify their claim. True, agriculture gets a higher outlay than in the past plan, but so does every other sector. The outlay for industry, for example, has been raised from the already high figure of Rs. 2,570 crores in the Third Plan to Rs. 6,286 crores in the Fourth Plan. In fact, the Fourth Plan outlay on agriculture is even less than that on industry during the Third Plan.

Nor does the increased outlay have much significance for the agricultural sector. Of the Rs. 2,475 crores of aggregate outlay, Rs. 300 crores are supposed to come from the private sector. How the Planning Commission could arrive at such a definite figure about the extent of private investment in agriculture is beyond one's comprehension. In any case, private sector investment in agriculture means only one thing: investment by the loan sharks or the traders-turned-lenders. Of the outlay in the public sector, Rs. 230 crores will be spent on the community development programme whose impact on agricultural production is perhaps no greater than that of a dead leaf falling on a pillow.

Not valid

Most of the funds for agricultural development are handled by the States. But as they can always look to the benign Centre for the supply of foodgrains, they neglect their agriculture with impunity. There are several instances where

Vidhana Soudha, Bangalore.

Sir,

Sub: Construction of Hydro Electric Project in Andhra Pradesh on the River Krishna in Mahaboobnagar District.

Ref: 1. From the Secy. to Govt. Mysore PWD.Lr.No.PWD 27GUK 65 dt. 13.12.1965.
2. From the Secy. to Govt. of Mysore PWD 11 BRA 66 dated 12.9.1966.

--:oo:--

With reference to your letters cited, I am directed to invite attention to the correspondence resting with your letters marginally noted:--

1) Your Lr.No.PWD/20/ rAP/65 dt.5.11.'65.
2) Your lr.of even No. dt.6.8.1966

2. The information desired therein will be furnished on receipt of the same from concerned Chief Engineer.

3. I am further to invite reference to your letter second cited and say that the Project is still at the stage of investigation. Relevent data is being collected by the field staff as soon as some schemes and projects are drawn up on the data collected the information required by the Mysore state will be furnished should it involve any submersion of Mysore territory. Where a Project involves submerssion in Mysore State the Project will be started by this Government only after the concurrence of Mysore Government is obtained.

xi) Allocation of Krishna Waters:- The sharing of Krishna Waters was the bone of contention among different States and equitable basis had to be worked out. The Union Minister for Water and Power was endeavouring to bring about an agreement among the States concerned. So far as Mysore State was concerned it had only an irrigation capacity of 8 per cent and was in that respect the poorest of the Southern States. There was good scope of bringing larger areas under irrigation. Backwardness of the area and population were two other factors to be taken into account while assessing the quantum of water to be allowed to each State. A fair deal to Mysore had to be secured in this regard.

Action is being taken in file no. PWD 1 BRP 59.

xx xx xx

c) Construction of tanks by Andhra Pradesh Govt. in areas adjacent to the boundary of Raichur Dist.

The Andhra Pradesh Govt. were constructing tanks in the vicinity of the border of Raichur District and there was the danger some of the areas within the territory of Mysore State getting submerged. The State Govt. may investigate into the matter and take suitable preventive action.

(Action: Public works Department)

In continuation of this Govt'sletter 1st cited, I am directed to state that the area of submergence in Mysore State is about 11,000 acres on account of the proposed Upper Krishna Hydro Electric Scheme under investigation. Though the exact submergence of cultivable landsin Mysore State stops somewhere below the road bridge, the F.R.L. contour plus 1100 extends even beyond the road bridge following the bank and bed of Krishna River right upto the railway bridge. A fresh blue print showing the approximate area of submergence of 11,000 acres of cultivable lands in Mysore state and the other details of the Upper Krishna Hydro Electric Scheme called for in your letter 2nd cited are enclosed.

2. As regards the position indicated in paras 2-3 of your letter last cited, I am to state that it is true that some of the staff of this State incharge of the investigation of the scheme had visited some areas in Raichur District. of Mysore State for reconnaissance purposes and to gather data regarding discharges in the Krishna River asper gaugings conducted by the C.W.& P.C. But, these visits were purly preliminary and do not carry any significance. The details of the temples, houses etc., expected to be submerged under the project in Mysore State are not available and these details can only be gathered when detailed surveys of

P.T.O.

Sl.A. Irrigation
22-9-66.

79

the affected areas are conducted. I am also to state, in this connection, that what this Govt. propose to do now is only to conduct surveys relating to the project and that before the project is finalised and any construction is started affecting the areas in Mysore State, that Govt. will be consulted and their consurrence obtained as already clarified in this Government's letter 3rd cited.

In view of the position explained above, I am to request that early permission of the Government of Mysore to the surveys being conducted by the Chief Engineer Electricity (Civil) of this State within the territory of Mysore, may kindly be obtained and communicated urgently as the Surveys within the territory of A.P. have almost been completed.

Yours faithfully,

SALIENT FEATURES OF JURALA HYDRO ELEC.PROJECT.

LOCATION:-

i) a) Latitude, N. 16° - 17 '
   b) Longitude E- 77° - 48'

Situated across River Krishna in Atmacoor Taluk of Mahaboobnagar District. The site is 4 miles north of Gadwal Town and 4 Miles south of Atmacoor Town of Mahaboobnagar District.

ii) a) CATCHMENT AREA OF RIVER ABOVE DAM SITE:-

Free	51.68	Square miles.
Intercepted	45322	"
Combined.	50490	"

iii) DAM AND RESERVOIR:-

a) Deepest bed level	+ 908.00 ft.
b) F.R.L.of the Reservoir.	+ 1100.00 ft.
c) Minimum Draw down level.	+ 1040.00 ft.
d) Water spread at F.R.L.	114611 Acres.
e) Capacity at F.R.L.	164650 M.Cft.
f) Provision for silt at + 1040.00 .	16900 M.Cft.

g) MASONRY DAM:-

Length of spillway portion.	891 ft.
Length of Non-overflow portion	1089 ft.
Total length.	1980 ft.
Crest level of spillway.	+1050.00
Number and size of spillway gate 12 Nos.	66 ft. x 50 ft.
Number and size of River sluices.	18 Nos. 8ft.dia.

h) EARTH DAM:-

Left flank.	20,972 ft.
Right flank.	19,290 ft.
Total.	40,262 ft.

Height of the earth dam vary from 0 ft. to 125 ft. above the average bed level of River.

II. Upper Krishna Hydro Electric Scheme is located near Jurala village in Atmacoor Taluk of Mahaboobnagar Dist. The site is 4 miles South of Atmacoor town. This is 104 miles above Srisailam Dam Site.

III. This is a purely Hydro Electric Scheme. The type of scheme is for storage only .

IV. Proposed F.R.L. of the project is +1100 and the Water spread area is 11000 acres lies in Raichur District, Mysore Territory, along the Krishna River Margin upto the Railway Bridge.

V. This project is purely Hydro Electric Schme with no irrigation. The Power potentiality of the project is 120 M.W.firm and 240 M.W. seasonal totalling to 360 M.W. The power house consists of 2 units of 60 M.W. each for seasonal with stand bye one unit 60 M.W. for firm power and 4 units of 60 M.W. totally to 7 Units of 60 M.W.each.

Sub: Upper Krishna Hydro Electric Scheme - Investigation of water spread surveys in Mysore State permission of Government of Mysore - requested.

Ref: Your letter No. PWD 11 BRA 66 dated 29.4.67.

With reference to the above, I write to state that the reservoir, proposed by the Andhra Government, in connection with the Upper Krishna Hydro Electric Scheme and which they want to survey will involve submersion of nearly 11,000 acres of land in the Mysore State. This land may be a part of the atchkut proposed by our Government under Upper Krishna Irrigation Project. I therefore request that this subject may be referred to the Chief Engineer, Irrigation Projects for giving his opinion.

Yours faithfully,

(M.V.A. Setty)

2. From the Secy. to Govt. of Mysore PWD 11 BHA 66 dated 12-9-1966.

p.t.o.

With reference to your letters cited, I am directed to invite attention to the correspondence resting with your letters marginally noted:-

1. Your Lr.No.PWD 20 PAP/65 dt.5-11-65.
2. Your Lr.of even No. dt. 6-8-1966.

2. The information desired therein will be furnished on receipt of the same from concerned Chief Engr.

3. I am further to invite reference to your letter second cited and say that the Project is still at the stage of investigation. Relevant data is being collected by the field staff as soon as some schemes and projects are drawn up on the data collected, the information required by the Mysore State will be furnished should it involve any submersion of Mysore territory. Where a Project involves submersion in Mysore State the Project will be started by this Govt. only after the concurrence of Mysore Govt. is obtained.

Copy of letter No.PWD 11 BRA 66 dated 29th Oct. 1966 from the Secretary to Govt. of Mysore, P.W. & Electy. Dept. Vidhana Soudha, Bangalore, addressed to the Secretary to the Govt. of Andhra Pradesh, P.W.D. Hyderabad.

Sub:- Construction of Hydro-Electric Project on River Krishna in the Andhra Pradesh by the Govt. of Andhra Pradesh in Mahaboobnagar Dist.

I am directed to refer to your letter No.3314-D1/65 dated 24th September 1965 on the above subject requesting for permission to take up the surveys of the Hydro-Electric Project across Krishna, the water spread of which would affect the Mysore State. Particulars of this Project were called for in this Govt. letter No.PWD 20 PIP 65 dated 6th Aug. 1966, to enable this State Govt. to examine the question.

2. Meanwhile representations have been received from the people of Raichur District, that the officials of Andhra Pradesh have already visited the areas in Raichur District and have finalised the necessary surveys. If this report is true, then the action of the Andhra Pradesh offfcials in entering and conducting surveys in the Raichur District is highly objectionable and may lead to unnecessary complications. The Govt. of Mysore take serious exception to such an objectionable procedure.

(Contd...3)

3. Representations have also been received from the people in the Raichur District that the proposed Hydro Electric Project will cause submergence of a vast extent of lands, villages and houses in the Raichur District which we cannot afford. It has also been represented that important temples and pilgrimage centres situated in certain villages will also be submerged under this project. I am therefore to request kindly to arrange for the details of this project being furnished to this State at an early date.

GOVERNMENT OF MYSORE.

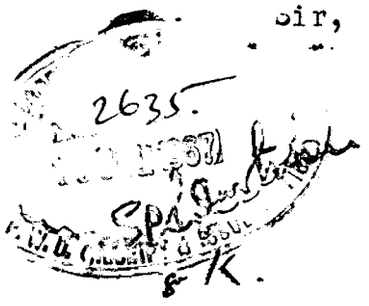
Office of the Chief Engineer, PWD,
Investigation of Projects,
Bangalore.

No. CEI/KGC/2/TM4. Dated 7th July 1967.

To

The Secretary to the Government of Mysore,
Public Works & Electricity Department,
Vidhana Soudha, Bangalore.

Sir,



Sub:- UPPER KRISHNA HYDEL SCHEME - GADWAL SCHEME OF ANDHRA PRADESH- INVESTIGATION OF WATER SHED SURVEYS IN MYSORE STATE, PERMISSION OF GOVT, OF MYSORE REQUESTED.

Ref:- (i) Government letter No. P.W.D 11/BRA/66 Page 53 dated 29.4.67
(ii) Government letter No. P.W.D 11/BRA/66 Page 90. dated 24.6.67.

.....

I write to state that even though the project contemplated by Andhra Pradesh Government is for Hydro Electric Power Generation only, the request of the Andhra Pradesh Government for conducting surveys in the Mysore area for the proposed Gadwal Project is not to be acceded to on the following grounds:-

(i) Inspite of repeated references, the final allocation of Krishna waters between the three States has not been made so far.

(ii) Even against the interim allocation of 800 T.M.C. to Andhra, the list of Projects so far sanctioned, executed and proposed in Andhra Pradesh has not been made available to this State.

(iii) The area, which will come under submersion if the Project materialises, though small and may be compensated for, can be brought under irrigation from either the Tungabhadra Project or the Upper Krishna Project. It is a matter for consideration as to whether an area which is to get the advantage of irrigation at a heavy cost should be allowed to be submerged for a power project which can be generated by other means but not at the cost of irrigation.

(iv) Andhra Pradesh has other Hydro-Electric Projects like Srisailam, Nagarjunasagar etc., downstream, inspite of protests by Mysore Government. At present there is no machinery to check or prevent either alteration in the scope of sanctioned project or ulterior use to irrigation also during execution.

P/2

Under the above circumstances, I suggest that even permission for investigation should not be acceded to.

Yours faithfully,

Chief Engineer, I/C,
Investigation of Projects.

M.M. 6-7:

Draft

No.PW 1.. BRA 6)

To,

The Secretary to the Govt.
of Andhra Pradesh, P.W.D. Hyderabad.

Sir,

Sub:- Upper Krishna Hydro Electric Scheme-
Investigation of water spread surveys
in Mysore State - permission of Govt.
of Mysore - requested.

I am directed to refer to your letter No. 3314-D1/65-18 dated 30-3-1967 on the above subject requesting ~~for~~ permission of Govt. of Mysore ~~to~~ to the surveys being conducted within the territory of Mysore and to state ~~that the final allocation of Krishna Godavari waters between the three States has not been made so far and that~~ taking up of the proposed project may prove detrimental to the interest of the State as ~~this Project~~ it would cause submerssion of about 11,000 to 12,000 acres of ~~lands~~ land in Raichur District of Mysore State involving 13 villages.

The area which will ~~have~~ come under submerssion is a fertile land, which ~~can easily~~ will be brought under irrigation from ~~either the Tungabhadra Project or~~ the Upper Krishna project. Government is therefore reluctant ~~not~~ to allow the area which has high advantage of irrigation potentiality to be submerged ~~by~~ for a Power Project, ~~which can be generated by other means but not at the cost of irrigation~~.

Under the circumstances it is regretted that it is not possible to concede to your request for the surveys being conducted within the territory of Mysore for the proposed Hydro Electric Project across the river Krishna near Gadwal.

Yours faithfully,

U.S. to Govt.

p.78 ante

In addition, the water works of Raichur Town & the bridge over Krishna on Bangalore Hyderabad road will also be submerged
